

# About Advanced Precision

Since 2006, Advanced Precision has specialized in the precision machining of metals and plastics. We have been supplying various industries including the Medical, Aerospace, Energy and Defense industries for over 10 years.

Our experience with different applications is vast, and quality has always been and remains our number one standard. We use an ISO 9001:2015 certified quality management system in order to achieve the highest quality products.

Our qualified CNC programmers will analyze your specific requirements and develop an individualized process plan. By understanding your needs, we see to it that your project will be successful the first time.

At our Reno Nevada machining facility, we have the knowledge and expertise to collaborate with customers like you.

Here at Advanced Precision, we believe in the value of education, this is why we have always offered tuition reimbursement to employees who want to continue their education. We hope to help our employees expand their skills and enrich their lives. Employees are always encouraged to learn and grow with Advanced Precision in new roles and positions. Everyone wins when we are all constantly learning.

We have teamed up with ACE High School, to offer employment for students who are eager to learn. Our high school students are highly motivated, intelligent and avid seekers of knowledge. We consider this to be a huge asset to our company and we are proud to have them as a part of the team.

The owner, Jake Mathis has been the President of The Machine Tool Advisory Committee at Truckee Meadows Community College since 2013. This committee helps to develop Machining Technology curriculum that benefits both students entering the workforce and their future employers. We are grateful to be a part of the building of a quality workforce!
